

2021: Volume 67, Issue 1

Dear Reader

GeoScience Engineering is an open access, peer-reviewed periodical journal aimed at publishing research results in Earth Sciences, Mining and Geological Engineering. The journal is published by the Faculty of Mining and Geology, VSB-Technical University of Ostrava, Czech Republic, and has been listed among peer-reviewed periodicals published in the Czech Republic since 2010.

We aspire to publish high-quality professional articles from all over the world, both from well-established authors and younger researchers. To stimulate the international exchange of knowledge and research findings, we provide scholars and practitioners with space to publish their original professional articles, reviews, and technical briefs, thus contributing to the interconnections of the academic and industrial sectors.

To communicate with international audiences, we publish in English. All articles are subject to a blind review process. All submissions are judged as for their relevance from the professional perspective, methodology, novelty of research findings, practical implications, and quality of presentation.

The current issue consists of 3 articles on different aspects of Earth Sciences, Mining and Geological Engineering (Digital Archiving of Historical Water Utilization Structures Using an Interdisciplinary Method by Š. Mudička et al.; Three-dimensional Non-linear Analysis based on the Temporal Evolution of an RCC Dam Including the Alluvium Effect by M. Adjadj et al.; and Kinetic Study of Reaction between Dolomite Ore and Trioxonitrate (V) Acid (HNO₃) by C. T. Are et al.).

Sincerely

Alena Kašpárková

Editor-in-Chief
